Patent-Only Resources (Grants and Published Applications)

These resources should be considered during a prior art search in this technology.

Resource Name	Resource Description
US Patent, Classified and Text Search	EAST/WEST, 1971-present. Classified Search. All patent documents in a classification are viewed for relevance to the patent application being searched. In some technologies only a "modified classified search" may be required; i.e., only certain patents in a classification need to be browsed, e.g., by a specific date range. Fulltext Search. Queries may include classification parameters when combined with other terms to be searched in the technical content of the application.
BRS Search/USOCR Database	EAST/WEST. Full text search of U.S. Patent Grants issued from 1920-1970. Includes the ability to formulate queries by classification.

PGPUBS	EAST/WEST. Database of US published applications, from 2001 to the present. USPC classification or full text search capabilities.
EPO Abstracts, Text and Classified Search	EAST/WEST. English abstracts database of published unexamined applications from EPO, WO/PCT, United Kingdom, France, Germany, and Switzerland, about 1978-present EPO patent documents in an USPC or an IPC classification are viewed for relevance to the patent application being searched.
